

EXPERIENTIAL INTELLIGENCE (EI) & VALUES BELIEFS CONVICTIONS® (VBC's)

EI includes everything experienced from "womb to tomb" that impacts & shapes Human self-identity Choose/Rank Judgment Patterns. VBC's® define your personal legacy of "senses driven" ability to perceive and interpret everything you experience 24/7 as either a Positive/Uncertain/Negative encounter in life. A SWPS™ 7 Portrait Series Choose & Rank Thinking Tool provides a comprehensional leap forward in better understanding the influences on one's life with your EI/VBC's Judgement Patterns decisions.

(1) The constant autonomic (unnoticed) perspective shifting with 2D<=>3D perception greatly influences interpreted meaning of any digital or printed image.

(2) The merging of Human General Intelligence Q&A thought and reasoning (HGI) with AI generated Artificial General Intelligence (AGI) programmed Q&A "thought" that creates our thinking identity.

ELON PEW'S PREDICTIVE SURVEY: IMPACTS OF AI/ROBOTICS DIGITAL LIFE BY 2025

A lot has changed with the read/respond digital mentality since 2014. The top concerns back then were about AI/robotics predicted advances and evolution by 2025 overtaking and dominating human self-awareness. Elon Pew was able to get detailed, deep practical/predictive thinking responses from 100's of leaders/influencers in all digital transitioning areas. This Elon Pew survey's overall consensus suggests that AI/robotics will displace significant numbers of both blue and white-collar workers and may lead to a vast increase in income equality – that people will be effectively unemployable and there will be a breakdown in the social order. However the same Pew University report suggests technology could not displace more jobs than it creates - but that most all newly created jobs will require extensive learning and mastery of technological interactive skills. The Pew Research Center today continues these efforts to accurately inform us about the dangers and benefits regarding the social, political and economic fallout from the spread of digital activities.
