

**THE GIFTED ADULT - MARY-ELAINE JACOBSEN**

**THIS SWPS™ 7 SERIES TOPIC - IS THIS YOU?**

**SHARED WISDOM PATTERNS SNAPSHOTS (SWPS™) HOTSPOTS OF 2D <=> 3D INSIGHT**

**EXPERIENTIAL INTELLIGENCE (EI) & VALUES BELIEFS CONVICTIONS® (VBC'S)**

EI includes everything experienced from "womb to tomb" that impacts & shapes human self identity Choose/Rank Judgment Patterns. VBC's® define your personal legacy of "senses driven" ability to perceive and interpret everything you experience 24/7 as either a Positive/Uncertain/Negative encounter in life. A SWPS™ 7 Portrait Series Choose & Rank Thinking Tool provides a comprehensive leap forward in better understanding the influences on one's life with your EI/VBC's Judgement Patterns decisions.

- (1) The constant autonomic (unnoticed) perspective shifting with 2D<=>3D perception greatly influences interpreted meaning of any digital or printed image.
- (2) The merging of Human General Intelligence Q&A thought and reasoning (HGI) with AI generated Artificial General Intelligence (AGI) programmed Q&A "thought" that creates our thinking identity.

**THE GIFTED ADULT – IS THIS YOU?**

Mary Elaine Jacobson shows America's 20 million Gifted Adults how to identify and unlock your extraordinary potential. These are people who break the mold and change the world, actualize their talents, and don't hesitate to "think different". Her best-selling book presents practical tools for measuring, enabling and supporting unconventional "evolutionary intelligence". (WM has identified 4 segments that have been created into SWPS™ 7 series capturing hotspots of this remarkable book authors insights.) Factual evidence that will be extremely valuable for Gifted Adults at all levels of self-discovery when pursuing self-awareness about evolutionary moments and self liberation. You may be someone who shares such qualities with figures as diverse as Elon Musk, Steve Jobs, Bill Gates – even Mother Teresa.

**HOW TO COMPLETE A SWPS SERIES™ FOR AWARENESS ENHANCEMENT**

**CHOOSE 4 SWPS PORTRAITS**

Skim/read the statements positioned around the RTH thinking head clockwise, 1,2,3,4 (or 1-8).  
Then scan the content in the Summation Boxes (SB) and Conclusion Boxes (CB) on each SWPS Portrait. Review all 7 SWPS Portraits in this series. Choose your 4 favorite SWPS Portraits and note this in the upper right hand corner of your chosen SWPS Portraits. 1st "✓" here to CHOOSE this SWPS \_\_\_\_

**REASONS NOTES**

What new interpretive EI/VBC's insights have appeared? Write what you deem important on the feedback lines at the bottom of each chosen SWPS portrait.

## SUMMATION BOX (SB): *Blend Vision & Fear into Genius*

Even though most gifted people have to grow into their genius, it is present as a seed from the beginning. Something in them cannot be ignored. Frequently behind workday smiles and greetings lies a question that rarely comes up in their conversations: "Who am I, and what am I doing here?" Most gifted adults were socialized in a way that encouraged them to dismiss such deep inquiry. Finding answers to their most profound existential speculations is a task that requires immeasurable courage and fortitude.

Book  
Pages  
24 - 25

Experience intentional 2D<=>3D shifting below: read statements clockwise around the RTH encapsulated thinking head

1. It is little wonder a shiver runs up their spines whenever their minds dare to wonder into such deep woods. There is little support for basic inquiries into our beingness.

2. Though they truly long for peace of mind and heart, and crave the creative lives they imagine for themselves, at the same time they want their growth to be smooth so that everyone around them will continue to like them.

4. In many cases, the final result is that there is something crucial missing from the "who am I?" puzzle. Their real identities continue to appear on the missing – persons list because of a perceptual gap in their self-image.

3. In my years of experience (MEJ) as a psychologist I have found that the "why" presents itself initially to my clients in the form of pain. We live in a society that has become habituated to the quick-fix solutions, with pathologizing labels such as "depression", "anxiety", "bad marriage", "bad job". At times, of course, these classifications are useful, at least for diagnostic purposes. However, for certain people such simplistic identification tags not only miss the point, but carry a heavy price.

Rank this Conclusion Box: 1 \_\_\_ 2 \_\_\_ 3 \_\_\_ 4 \_\_\_

## CONCLUSION BOX (CB): *Different Intelligence Birthright*

The one critical puzzle piece they must find in order to ascertain their rightful place in the universe is this: The promise of high potential and creative intelligence is accompanied by a set of personality traits and inner processes - not simply more of some attribute, but an altogether different quality of thinking and experiencing.

## SUMMATION BOX (SB): *Blend Vision & Fear into Genius*

Well developed skills of consequential thinking help us avoid unnecessary upset. This also reopens the channel to the natural optimism of the everyday genius, which often seems to disappear under a layer of emotional wounds or negativity. As healing old wounds renews our strength, confronting adversity is a question of who gives up and who does not. Fortunately, whether we like it or not, giving up is not a part of the everyday genius character. Maintaining the course of full potential is all about staying power. If our high potential is to be realized, we have to develop, and faithfully maintain, an internal style of optimism. In many respects, durable optimism is the source of our staying power.

Book  
Pages  
29 - 30

Experience rational 2D<=>3D shifting below: read statements clockwise around the RTH encapsulated thinking head

1. When our ideas take a beating in the external world, we feel alone and unsure.

2. When others misunderstand who we are, we feel alone and unsure.

4. And above all, when we dare to forge ahead into the new frontier while others around us think we lost our minds, we feel alone and unsure.

3. When we are snowed under with projects that are not challenging or interesting, we feel alone and unsure.

Rank this Conclusion Box: 1 \_\_\_\_ 2 \_\_\_\_ 3 \_\_\_\_ 4 \_\_\_\_

## CONCLUSION BOX (CB): *Different Intelligence Birthright*

These are the challenging times that force us to call upon our powers of resilience. The best smartmove is to be proactive - mentally prepared for both positive and negative experiences with new, more resourceful responses. By realistically and optimistically assessing where we are and what we are doing in an integrated way – realistic and optimistic – we are more likely to stay the course of advanced development. Resilience in the face of adversity is essential because advanced development cannot occur without encountering obstacles.

## SUMMATION BOX (SB): *Blend Vision & Fear into Genius*

In brief, IQ tests measure learned ability, not potential ability. At best, they are keys that open particular doors of understanding, and must never be used to lock down the door of possibility. Group achievement testing is commonly used while individual assessment of ability is rare. The types of tests generally given are for purpose of determining subject-matter mastery versus aptitude. American psychologist Howard Gardner proposed a theory of "multiple intelligences," asserting there is no such thing as singular intelligence.

Book  
Pages  
51, 52,  
53, 54

Experience intentional 2D<=>3D shifting below: read statements clockwise around the RTH encapsulated thinking head

1. Linguistic intelligence: A proficient and easy use of words and sensitivity to phrasing and the rhythm of language in poetry, song lyrics, and persuasive speaking.

8. Naturalist intelligence: A special ability to grasp the intricate workings and relationships within nature; an instinctive reverence for a connection with animals, plants, minerals, ocean, sky, desert, and mountain.

7. Intra-personal intelligence: Advanced understanding of one's inner landscape, motivations, emotions, needs, and goals.

6. Inter-personal intelligence: Advanced understanding of human relations and management of feelings.

2. Musical intelligence: A special sensitivity to tempo, pitch, timbre, and tone, and an ability to create and express musical arrangements that correspond to emotional experience.

3. Logical-mathematical intelligence: Powers of inductive and deductive reasoning in handling abstract relationship and predictions based on numbers and equations.

4. Spatial intelligence: The ability to visualize objects in the mind and transfer the information to something concrete, such as designing an airplane or laying out a movie set.

5. Bodily (kinesthetic) intelligence: Exceptional body control and refined motion that permits skilful expression of ideas and feelings through movements.

Rank this Conclusion Box: 1 \_\_\_\_ 2 \_\_\_\_ 3 \_\_\_\_ 4 \_\_\_\_

## CONCLUSION BOX (CB): *Different Intelligence Birthright*

Gardner's concept promoted the identification and development of domains of potential excellence and high performance. We can benefit from identifying abilities according to Gardner's domains. What we need to do is mindfully consider and build upon given talents, cultivate skills that are necessary but in which we are deficient, track our progress, and unveil avenues of growth that may bolster satisfaction and achievement.

## SUMMATION BOX (SB): *Blend Vision & Fear into Genius*

**As we have been indoctrinated with the notion that a single IQ number, such as 109, 123, or 145, is a true indicator of the ability from which we can determine the limits of our potential, including giftedness. However, we now know that is a single IQ rating.**

Book  
Page  
56

Experience intentional 2D<=>3D shifting below: read statements clockwise around the RTH encapsulated thinking head

**1. It does not validly describe the intelligence of many individuals.**

**2. It is a finite measure of performance that can change over time.**

**4. It all but ignores creativity and other specialized aspects of human potential.**

**3. It cannot claim to measure the multifaceted factors of ability proposed by current research on intelligence.**

Rank this Conclusion Box: 1 \_\_\_ 2 \_\_\_ 3 \_\_\_ 4 \_\_\_

## CONCLUSION BOX (CB): *Different Intelligence Birthright*

**Giftedness is far more complex than just more intellectual capacity, which means we must look anew for the Everyday Geniuses in our daily lives and unexpectedly in ourselves.**

## SUMMATION BOX (SB): *Blend Vision & Fear into Genius*

**Gifted adults are many in number. The most crucial aspects of such individuals' character, their intellectual and emotional intensities are mistaken for something else. Instead of being viewed as exceptionally aware, insightful, and responsive, gifted people naturally exhibit traits that are considered excessive. It is no wonder that gifted adults are ignored or misinterpreted when we have not met the needs of society's gifted children. Perhaps it will help to look at early observable traits that distinguish the bright child from the gifted child:**

Book  
Pages  
56, 57,  
58

Experience intentional 2D<=>3D shifting below: read statements clockwise around the RTH encapsulated thinking head

**1. Bright child knows the answers,  
Gifted child asks the questions.**

**2. Bright child answers questions,  
Gifted child questions answers.**

**4. Bright child is self-satisfied,  
Gifted child is highly critical of  
self (perfectionist).**

**3. Bright child listens well, Gifted child  
shows strong feelings and opinions.**

Rank this Conclusion Box: 1 \_\_\_ 2 \_\_\_ 3 \_\_\_ 4 \_\_\_

## CONCLUSION BOX (CB): *Different Intelligence Birthright*

**When we broaden the definition of giftedness and intelligence to include specialized exceptional traits (for example, spacial or linguistic ability, mathematical reasoning, memory), as current research recommends, it seems obvious that there are many more gifted adults than previously believed. "As a general estimate it is safe to assume that 10 percent of the adult population, by any set of psychometric criteria, can be considered gifted. This means that the total number of unidentified gifted adults in the United States amounts to approximately twenty million individuals." Furthermore, it can reasonably be assumed the greater portion of them have never been identified as gifted and have no idea how deeply that lack of information affects their lives and well-being.**

## SUMMATION BOX (SB): *Blend Vision & Fear into Genius*

**A sense of optimism is a natural complement of the Everyday Genius personality. It is the hope for something better that is the foundation of Intensity, Complexity, and Drive. Every day, in every circumstance, we must have access to optimism as apart of our resilience scheme. Optimism is vital to the Gifted's Advanced Development because the barriers to fulfillment of high potential are notoriously fear-based.**

Book  
Page  
300

Experience intentional 2D<=>3D shifting below: read statements clockwise around the RTH encapsulated thinking head

1. Underlying fear of trust for self and others.

2. Fear of failure.

8. Fear that our inspired product will be exploited in the real world.

3. Fear of rejection.

7. Fear that an inspired product will be overlooked.

4. Fear of being hurt.

6. Fear of being outdone by another.

5. Fear of having to admit a mistake.

Rank this Conclusion Box: 1 \_\_\_ 2 \_\_\_ 3 \_\_\_ 4 \_\_\_

## CONCLUSION BOX (CB): *Different Intelligence Birthright*

**Yet fear is only as powerful as we allow it to be. Facing fear must be part of our liberation plan, since we can only be truly alive and free to become ourselves when we insist upon viewing our experience through an optimistic lens.**
